## INTRODUCTION

My name is Anthony Coffey, and I am a full stack developer based in Austin, Texas. I'm a passionate learner and a competent problem solver who is committed to delivering quality work in a timely manner, while providing top-notch customer service from the beginning until the very end of our engagement.

Beyond technical expertise, I am very experienced interfacing directly with clients and team members to solve problems in an organized, efficient and well-documented manner.

Additionally, I'm a team player with exceptional written and verbal communication skills. You can read more about me on my [website](#), and don't forget to follow me on social media!

## WORK EXPERIENCE

### Coffey Web Development — Owner / Operator

January 2014 - Present

I've spearheaded a successful web development and consulting company since January 2014. I have worked with clients in financial, medical, retail, and insurance industries to develop websites and web applications that leverage sales, increase productivity, improve business functions, and help clients make informed decisions from analytics data collected on conversions and user behavior.

### Smart Insurance, Inc. remote — Web App Developer

June 2016 - Present

Designed and developed pixel perfect websites/web applications on the WordPress platform that adhere to latest web standards and SEO best practices. I provided detailed estimates for new projects and handled support requests quickly and efficiently. I managed source code for dozens of projects and wrote technical documentation. I created instructional videos and documents for training purposes to educate staff members and users alike.

I have a proven track record of success at UpWork.com, check out my profile!

## WORK EXPERIENCE CONTINUED

### **GLIDEdesign.com** Austin, Texas — Developer / Support Technician

January 2017 - November 2017

Worked with clients and team members to handle support requests, develop patches for new features and bug fixes. I worked directly with clients to identify solutions and troubleshoot problems. I also developed plugin extensions for popular WordPress plugins like WooCommerce, Gravity Forms and BuddyPress and custom WordPress plugins to solve a variety of real world problems.

### **RiskproAdvisor.com** remote — Full Stack Web Developer

January 2014 - June 2016

RiskPro Advisor is an AWS based web app for financial advisors, firms, and institutions that provides investment calculation and account management with heavy integration to partners' systems.

Using Agile development, I worked with the founding team to design, develop and deploy the beta/alpha versions of the investment calculator that is now widely used around the globe.

After launch, I worked to maintain source code repositories and developed several patches for bugs and new features that improved UX/UI, increased profits and productivity in the workplace.

### **Obzervant.com** Austin, TX — WordPress Developer

August 2015 - December 2015

Obzervant is a B2B Marketing Agency, and here I worked on-site with the Creative Director and CEO to design, develop and deploy solutions on the WordPress platform. I was in charge of maintaining source code repositories, collecting data from Google Analytics to monitor conversion rates and user behavior, and additionally performed split A/B testing, etc. to identify which landing pages performed the best, and why. Here, I also designed and developed landing pages and fully responsive email templates for email blasts and newsletters.

### **SqueekPress.com** remote — Junior Web Developer

August 2012 - July 2015

At Squeekpress.com, I developed white label plugins and themes on the WordPress platform for enterprise-level clients. I spent hundreds of hours working with OAuth, Google API, Dropbox API and other RESTful APIs to develop new features that increased sales and productivity by building tools to enhance employer/employee/user workflow.

## TESTIMONIALS

"Anthony's been great to work with the past couple years. He's been extremely professional and has always delivered a top notch product. He is as competent of a developer as there is in the business. In the rare event he doesn't have personal experience with a certain type of project or request, he's an extremely quick learner and will be up to speed and on top of it in no time. Instead of simply being a "drone" to carry out requests, Anthony wants the project to succeed as much as his clients do and often provides feedback which helps improve the project or original idea. This is an extremely valuable trait and is unfortunately far too uncommon amongst most developers. You'd be lucky to have him!"

Brandon S. Page - *CEO*

---

"Just wanted to send you a formal recommendation on your candidate Mr. Coffey. He is an amazing and talented individual that I have had an excellent track record with. Before I came on board with UT Southwestern Medical Center, I was also a senior architect/developer for web and mobile applications with a group of individuals that have been together for over 8 years. One of those individuals was Anthony. We worked together on some pretty extensive products from a multi facet networking platform, to applications within the FINTech space.

As an entrepreneur we know that having a core team that can handle the constant demand that this industry throws at us, is very important for the success of a project and the happiness of the client. Anthony was a valuable asset in helping bring the RiskPro from prototype to full scale deployment on a nationwide scale. That project grew into a \$1.9 million development budget and moved over to Seattle for its HQ and is continuing to grow. Anthony's extensive knowledge of the frameworks / technologies was essential in solving some serious problems on frontend/backend designs.

One thing I remember the most about working with Anthony his ability to take on problems that he wasn't 100% sure of what the solution would be, but was able to quickly and fully understand tech/data flow and come up with a viable and solid solutions to fix the issue at hand. Anthony has grit and grit is necessary in this industry that is as fast moving and always evolving.

Anthony has a passion for clean code and solution-driven methodology. He is a hard worker who understands the bottom line and most importantly customer satisfaction.

I have worked with 1000's of people in my life and majority of that has been in the military. As a 12 year combat veteran – I would recommend or hire Anthony, he is a great asset and effective contributor of any project he is involved in.

I could go on – but I won't. Hope this sheds some light into who you are considering for the position"
